Professional Summary:

DevOps-focused Cloud Engineer with hands-on experience in AWS infrastructure, Linux systems, Terraform automation, Docker containerization, and CI/CD pipelines using Jenkins. Experienced in deploying cloud applications, managing infrastructure as code, and automating system operations. Currently working as a Cloud Application Developer Trainer while building real-world DevOps projects and cloud environments.

Technical Skills:

Cloud Platforms:

AWS (EC2, VPC, S3, IAM, Route53, CloudFront)

DevOps & CI/CD:

Docker, Kubernetes, Jenkins, Helm, Terraform

Monitoring:

Prometheus, Grafana, AWS CloudWatch

Version Control:

Git, GitHub

Operating Systems:

Linux (Ubuntu, Amazon Linux)

Scripting:

Bash / Shell

Projects:

End-to-End CI/CD Pipeline with Jenkins, Kubernetes, and Helm

GitHub: <https://github.com/KingFate111/aws-devops-cicd-k8s-pipeline>

- Designed and implemented an automated CI/CD pipeline integrating GitHub, Jenkins, Docker, Kubernetes, and Helm to deploy containerized applications.
- Configured Jenkins pipeline automation to trigger deployments upon code updates, enabling continuous delivery of application releases.
- Deployed application containers from DockerHub (kingfatedocker/newapplication:02) into a Kubernetes cluster using Helm charts for simplified configuration and release management.
- Implemented Kubernetes Deployment and Service resources to manage application replicas and expose the service externally via NodePort.
- Structured the project using Infrastructure and deployment automation practices, improving reproducibility and consistency of application deployments.
- Demonstrated practical DevOps concepts including CI/CD workflows, container orchestration, Helm-based packaging, and Kubernetes resource management.

Technologies Used:

AWS, Jenkins, Docker, Kubernetes, Helm, GitHub, Linux

AWS Infrastructure Automation with Terraform & Docker Deployment:

- Provisioned AWS infrastructure using Terraform including VPC, subnets, Internet Gateway and

EC2

- Automated EC2 configuration using `user_data` scripts to install Nginx and Docker
- Deployed static website and containerized Node.js application on EC2
- Managed infrastructure provisioning using Terraform state for reproducible deployments

Then add one line:

Technologies: AWS, Terraform, Docker, Linux, Git

GitHub: github.com/kingfate111/aws-terraform-docker-project

Work Experience:

: Senior Executive - Operations (Cloud Application Developer Domain Trainer)

[Eduspark International Pvt. Ltd. – An Ampersand Group Company.](#)

Affiliated with [Govt. Skill India](#) & [NSDC Initiative](#) | MIDC, Pune

Aug 2025 – Present

Key Technical Work:

- Designed and deployed AWS infrastructure labs including EC2, VPC, IAM and S3
 - Built CI/CD pipeline demonstrations using Jenkins and GitHub for automated deployments
 - Implemented containerized application deployment using Docker
 - Automated infrastructure provisioning using Terraform and shell scripts
 - Developed practical DevOps workflows covering Git, Docker, Jenkins, and AWS deployment
-

: Jr. Data Analyst

[Robotics India Live](#) – [Amravati], India

09/2024 – 05/2025

Key Responsibilities:

- Collected, cleaned, and analyzed data on robotics innovations, startups, government initiatives, and academic research across India.
- Created interactive dashboards and reports using Excel, Power BI, and SQL to identify trends in robotics adoption and regional growth.
- Assisted the editorial and research teams with data-driven insights for articles, whitepapers, and industry reports.

Internship Experience:

: Data Analyst Trainee

[Exelr Ltd.](#) – Remote (Virtual)

June 2024 – August 2024

Key Responsibilities & Project:

- Performed SQL-based data analysis and reporting for sample datasets
- Developed basic dashboards and insights during analytics training program

//Project Link: <https://github.com/KingFate111/Music-Store-Analysis-SQL->

Blockchain-Based Higher Education Credit Platform(B.E Final Year Group Project):

- Developed a secure platform to **verify academic credits**, simulating **blockchain-based smart contracts** for **transparency** and **immutability**.
 - HTML, CSS, Bootstrap, JavaScript, and SQL.
 - Improved academic record verification accuracy and demonstrated potential for **decentralized education credentials**.
-

Portfolio Website: (<https://kingfate111.github.io/PortfloioWeb/>)

I have created a multi-page portfolio website showcasing my ongoing and completed projects to demonstrate my technical capabilities.

In this project, I use HTML and CSS for **the front-end** and JavaScript for **the back-end**.

Education:

Sipna College of Engineering and Technology, Amravati, Maharashtra 2020-2024 Bachelor of Engineering(B.E) in Computer Science | C.G.P.A: **8.6/10**

Municipal Junior College Of Science | Achalpur Camp, Paratwada 2018-2020 MSBSHSE HSC General Science (PCMB)

National Military School & Junior College of Science, Gaigaon, Akola 2012-2018 MSBSHSE SSC General | Percentage: **88.60/100%**

LEADERSHIP & INTEREST

Communication: High School Gathering Main Anchor (Front Of 7000 People). **Sports:** Division Level **Karate** Champion (Golden Brown Belt Holder). **Style** - Shotokan, Okinawa **Interest:** Reading Biographies of Greatest Leaders(ex, Chanakya | Chatrapati Shivaji Maharaj). **Bike Riding | Playing Battle Royale Games, etc.**
